## PROFILE

*Software development professional with extensive commercial experience of creating and supporting business critical IT services across multiple sectors.*

Working as leader of development teams, and as an individual contributor, I have a proven record of applying technical knowledge and business awareness to create efficiency and effect system change in banking & investment fund organisations. I have a true client focus and an attention to detail which ensures delivery of robust software.

## STRENGTHS

- ✓ Problem solving
- ✓ Analytical approach
- ✓ Effective communicator, bridging the gap between users and technical IT staff
- ✓ Attention to detail
- ✓ Client Focus
- ✓ Team Player

## EXPERIENCE

### Owner of albadigital / Senior Application Developer

*Working on client site @ UBP (UK) Ltd, St Helier, Jersey, 08/19 to date*

From client engagement, requirements gathering, design and analysis to development testing and implementation - I was involved in all aspects of software delivery, utilising various technologies & AI tools including GitHub CoPilot to accelerate development

- Building UI & backend applications to create new group wide tools to digitise manual workflow processes
- Liaising with business teams to integrate, enhance and support legacy bank platforms in multiple business areas including Banking, Portfolio Management and Regulatory Reporting
- Managing 3<sup>rd</sup> party software suppliers to oversee system implementation and configuration
- Digitising various end-user developed VBA tools

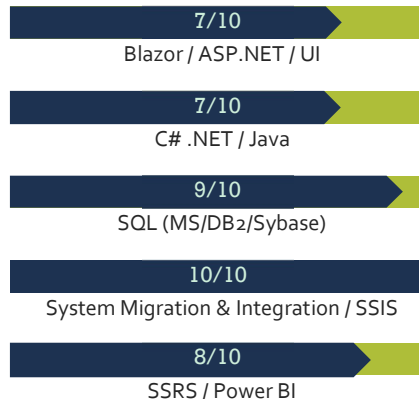

### Digital Business Change Manager

*Saltgate Ltd, St Helier, Jersey, 10/16-> 07/19*

Managed the adoption and integration of various fund accounting and administration platforms to maximise return on investment. Automated financial account production and generated high quality reporting for Private Equity and Real Estate fund partners.

- Liaised with various vendors/partners to evaluate technologies to enable digital transformation
- Pitched new solutions to prospective new institutional clients
- Built custom solutions to facilitate data migrations & system interfacing
- Responsible for defining internal application team processes, mentoring staff & user training

## SKILLS

## EXPERIENCE (CONT)

### Application Development Manager

*SG Hambros Private Banking, St Helier, Jersey, 04/14->10/16*

Led a large team of permanent and contract developers responsible for the delivery and 3<sup>rd</sup> line support of a range of private banking solutions.

- Responsible for all in-house development to build group wide system interfaces across a range of technologies and platforms
- Experience of recruiting and managing team of permanent, contractor and consultancy resources based in Jersey, London and India
- Worked closely with all business stakeholders and IT staff to monitor and report on project delivery within regulatory and budgetary constraints
- Implementation and support of real-time and batch system interfaces including data warehousing and real-time payments

### Senior Application Developer

*SG Hambros Private Banking 11/06->04/14*

Gained extensive exposure to working within financial services. Role demanded proficiency in a wide variety of different technologies and business domains.

- Designed, built and implemented a new front office contact management system for the bank based on the Microsoft Dynamics platform
- Was the main developer on multiple successful projects that have driven process efficiency and regulatory compliance in the following areas:-
  - New Client / Prospect Management
  - Basel II Reporting
  - Investment Performance Reporting
  - Credit Risk Management (Developed an innovative Collateral Allocation Engine unique to the bank)
